Built for dependable supply.

SHAKTI

A gas for every process. A supply model for every requirement.

A fully integrated industrial gas platform — manufacturing, logistics, and supply — engineered for reliability across India's most demanding industries.

Made with GAMMA

25+ Years of Industrial Gas Leadership

Shakti Group has built an integrated industrial gas platform spanning manufacturing, supply and infrastructure across India. Our capabilities support the delivery of gases essential to industrial operations — backed by the scale, reliability and compliance standards that critical applications demand.

178 TPD

Air seperation Unit

Producing LIN, LOX, LAR and LMO at Karjan, Gujarat.

270 TPD

CO2 Manufacturing Capacity

Across multiple facilities across Western, Central and Southern India

65+

Cryogenic Tankers

GPS-tracked with decanting pumps for continuous, reliable delivery

20+

Gases Supplied

Bulk cryogenic, industrial, medical, and specialty applications

8+

Industry Sectors

Served with integrated solutions and flexible supply models

6+

Refilling Centers

Supplying multiple packaged gases across Gujarat.

Integrated Platform

From air separation and CO_2 production through to last-mile cryogenic delivery, every link in the supply chain is owned and operated by Shakti Group — eliminating third-party dependencies and ensuring continuity.

Built for Scale

With over two and a half decades of operational experience, Shakti Group has developed the scale and execution capabilities to support large, continuous industrial requirements across multiple geographies simultaneously.

Made with GAMMA

Complete Supply Chain: From Plant to Customer

Producing the gas is one part of the job. The other is ensuring it reaches your facility when you need it. Our integrated supply infrastructure connects manufacturing, storage and delivery—supporting the movement of bulk industrial gases from our facilities to your operations.

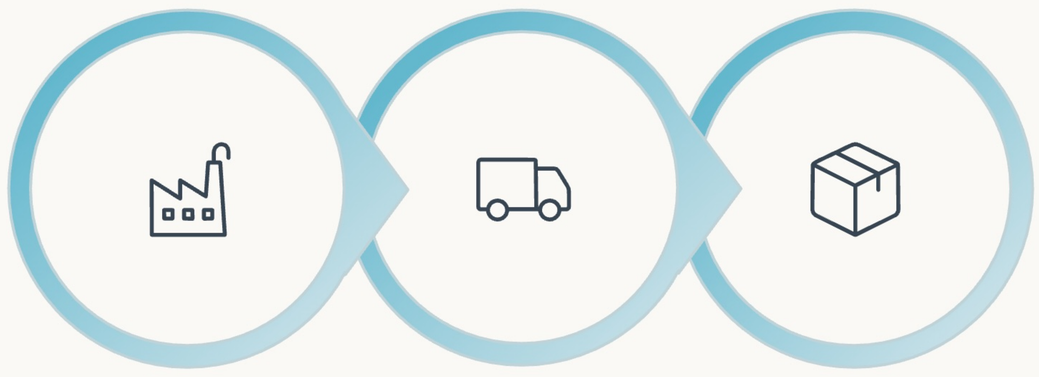
Manufacturing Backbone

Karjan, Gujarat

178 TPD Air Separation Unit producing Liquid Oxygen, Nitrogen, and Argon at scale for bulk industrial supply across Western India.

CO_2 Production Network

Facilities in **Ahmedabad, Lebad, Barwaha, and Hyderabad** — strategically positioned to support key industrial and food-grade markets across multiple regions.



Logistics & Distribution

65+ Cryogenic Road Tankers

GPS-tracked fleet equipped with decanting pumps for direct customer delivery. Real-time visibility across every vehicle in the network.

Bulk Storage Infrastructure

Supporting production, inventory management, and continuous supply — with on-site storage solutions available for high-volume customers.

Refilling & Distribution Hubs

Regional nodes supporting packaged gas requirements across cylinders, MCP quads, tube cascades, and specialty formats.

Made with GAMMA

Comprehensive Gas Portfolio

Our portfolio spans **20+ gases** across bulk cryogenic, industrial, medical and specialty applications. Supported by our manufacturing capabilities and supply infrastructure, we deliver products with a focus on quality, consistency and applicable regulatory requirements.

Bulk & Cryogenic Gases

Liquid Oxygen (LOX)

Metals, manufacturing, healthcare, and process applications — **≥99.5% purity**

Liquid Nitrogen (LIN)

Inerting, blanketing, and cryogenic processing — **≥99.999% purity**

Liquid Argon (LAR)

Welding, metallurgy, and controlled industrial processes — **≥99.999% purity**

Liquid CO_2

Food & beverage, industrial processing, and specialised applications

Industrial, High-Purity & Specialty

Industrial Gases

Hydrogen, Dissolved Acetylene, Helium, Compressed Air

High-Purity & Calibration

Grade 5.0–6.0 UHP gases, calibration mixtures

Specialty Gases

SF_6, HCl, Chlorine, Methane, Propane, SO_2, H_2S, Ethylene Oxide

Regulated & Certified Products

Medical Gases

FDA-licensed Medical Oxygen IP

Food-Grade

FSSAI-certified Liquid CO_2 (E290), food-grade Nitrogen, Dry Ice

Quality Assurance

WHO-GMP certified manufacturing with validated batch testing and analytical traceability

Made with GAMMA

Safety, Approvals & Certifications

All manufacturing plants, bulk storage installations, road tanker fleets, and filling infrastructure operate under strict statutory approvals and certified international management systems. Safety and compliance are non-negotiable at every stage of our operations.

Statutory Approvals

100% PESO Approved

All production plants, cryogenic storage vessels, road tankers, tube cascades, and manifold filling stations fully approved by the Petroleum and Explosives Safety Organization.

In-House Cylinder Testing

Dedicated PESO-approved cylinder testing station performing mandatory periodic hydrostatic stretch testing, internal boroscope checks, valving, and PESO neck stamping.

International Management Systems

ISO 9001:2015

Quality Management System spanning production to delivery

ISO 14001:2015

Environmental Management System

ISO 45001:2018

Occupational Health & Safety Management System

Regulated Product Certifications

FDA Licensed

Approved for manufacturing, filling, and distribution of Medical Gases and healthcare solutions

WHO-GMP Certified

Strict cleanliness, validated batch testing, trace impurity controls, and full analytical traceability

FSSAI Certified

Food Safety and Standards Authority of India approval for food-grade Liquid CO_2 (E290), food-grade Nitrogen, and Dry Ice

Made with GAMMA

Industries We Serve

Shakti Group's integrated gas platform supports eight major industry verticals — each with distinct gas requirements, purity specifications, and supply continuity demands. Our product portfolio and supply infrastructure are designed to meet these varied needs from a single, reliable partner.

Metals & Manufacturing

Oxygen for combustion enhancement, Argon for welding atmospheres, Nitrogen for inerting and heat treatment processes

Chemicals & Process

Specialty and high-purity gases for reaction control, inerting, and process applications requiring precise gas specifications

Glass & Ceramics

Oxygen enrichment for furnace efficiency, Nitrogen for controlled atmosphere processing and annealing

Food & Beverage

FSSAI-certified CO_2 (E290), food-grade Nitrogen for MAP packaging, and Dry Ice for cold chain logistics

Life Sciences

FDA-licensed Medical Oxygen IP, and WHO-GMP certified gases for pharmaceutical and healthcare applications

Energy & Infrastructure

SF_6 for electrical switchgear, Hydrogen for cooling, and specialty gases for energy generation and transmission

Water & Environment

Oxygen for wastewater treatment and aeration, CO_2 for pH correction, Chlorine for disinfection processes

Electronics & Semiconductor

Ultra High-Purity (UHP) Grade 5.0–6.0 gases and calibration mixtures for precision manufacturing

Made with GAMMA

Supply Models Matched to Your Needs

Not every customer requires the same supply model. The right solution depends on consumption volume, application, continuity requirements, and available infrastructure at your location. We match the supply model to your requirement — and integrate storage, delivery, and ongoing replenishment into a single managed solution.

Bulk Liquid Supply

For large and continuous consumption requirements. Direct road tanker delivery with GPS tracking and decanting pumps. Continuous replenishment based on operational demand.

On-Site Storage Solutions

Cryogenic storage and vaporizer infrastructure designed around your requirements. Professional installation and commissioning support. Integrated model combining storage, installation, and ongoing supply.

Packaged & Cylinder Supply

Industrial and specialised applications requiring flexible supply formats. Standard cylinders, MCP quads, tube cascades, and specialty packaging. Regional distribution hubs supporting packaged gas requirements.

Every supply model is backed by Shakti Group's owned manufacturing capacity, GPS-tracked logistics fleet, and regional distribution infrastructure — ensuring continuity regardless of the format chosen.

Made with GAMMA

One Group. Complementary Capabilities.

Shakti Group brings together nine specialized operating companies, each managing dedicated manufacturing units, product lines, and regional distribution nodes. Together, these capabilities create a broader platform across industrial gas manufacturing and supply — with depth in every product category.

Shakti Industrial Gases

Supplier of Argon, Oxygen, Nitrogen, and Carbon Dioxide in bulk liquid and cylinder formats

Shaktishree Air Pvt. Ltd. (SAPL)

Cryogenic **178 TPD Air Separation Unit** producing Liquid Oxygen, Nitrogen, and Argon

Indore Carbonic

Manufacturer of Liquid Carbon Dioxide with **270 TPD capacity** across Ahmedabad, Indore, and Hyderabad

Shreeji Acetylene Co.

Dedicated manufacturer of Dissolved Acetylene (DA) Gas for industrial cutting and welding applications

Shakti Gases

Specialists in High-Purity (HP) and Ultra High-Purity (UHP) Hydrogen, delivered via cylinders, mcps quads and cascades

Bhavani Enterprise

Leading supplier of Dry Ice in Pellet and Block formats for cold chain and food-grade applications

Shakti Air Products, Vidyanagar Gases & Moxi Industrial Gases

Regional suppliers of compressed gases and CO_2 serving local industrial demand centers

Made with GAMMA

Reliability You Can Build On.

Shakti Group brings together wide-ranging product capability, proven manufacturing infrastructure, and supply systems built for reliability and continuity. We know industrial gases are mission-critical to your operations — which is exactly why our systems are engineered for uninterrupted supply.

Why Partner with Shakti

Comprehensive Portfolio

20+ gases across bulk cryogenic, industrial, medical, and specialty applications — from a single integrated partner

Manufacturing Backing

448 TPD capacity with facilities positioned near key industrial demand centers across India

Supply Infrastructure

65+ cryogenic tankers, bulk storage, and distribution hubs ensuring continuous availability

Regulatory Excellence

100% PESO-approved, ISO-certified, FDA-licensed, and WHO-GMP compliant operations

Flexible Solutions

Bulk liquid, on-site storage, packaged supply — matched to your specific volume and continuity requirements

Get in Touch

Reach out to discuss your gas requirements, supply model options, or to request a site assessment from our technical team.

Our Commitment

Every engagement starts with understanding how you operate — consumption volumes, purity requirements, continuity needs, and site infrastructure. From there, we design a supply solution built to fit, backed by Shakti Group's full manufacturing and logistics platform.
